

WHY SHOULD I OFFER MY EMPLOYEES VISION BENEFITS?

Vision insurance promotes good eye health, which is essential to maintaining good overall health and disease detection and prevention.

More than
50%
of employees
believe vision is
a **MUST-HAVE**
benefit.

For every dollar a company invests
in vision benefits, it receives

\$1.45

through lower healthcare costs,
improved productivity and
lower turnover rates.

Save money on health
premiums by detecting
serious health
conditions early:

34% of new
diabetes cases
were first identified
through a routine
eye exam

39% of new high
blood pressure
cases were first
identified through
a routine eye exam

63% of new high
cholesterol cases
were identified
through a routine
eye exam
